

PRODUCT DATA SHEET

PEG-COOH PS Magnetic Particles

Description

Abvigen's PEG PS Magnetic Particles are designed with PEG-COOH groups in the whole size range of 2 μm to 12 μm . The particles are stable in aqueous media and to some extent in DMSO. They are supplied in water without any surfactants. Thus the particles can be directly applied for the covalent binding of proteins, antibodies or other target molecules, e.g. after carbodiimide activation of the COOH groups.

For custom sizes, formulations or bulk quantities please contact our customer service department.

Characteristics

Diameter: 2 μm -12 μm

Size: 10 ml

Concentration: 50 mg/ml

Composition: PS Magnetic Particle

Shape: Spherical

Functional Group: PEG-COOH

Density: 1.1 g/ccm

Buffer: DI Water

Form: Suspension

Colour: dark brown

Highlights

Narrow size distribution

High colloidal stability

Low non-specific binding

Easy conjugation

Storage

1378 US-206 Ste 6-126, Skillman, NJ USA
Tel: 1-816-388- 0112 Fax: 1- 888-616-0161
